

r21.2 Changelog

+-----+
| r21.2 Release - 90501
+-----+

Release day - 15h June 2022

New Features

- DSOF-17918 - vx4+ Support

Fixes

- DSOF-21017 - Fixed an issue where projects with a stage render layer could not launch
- DSOF-20982 - Fixed an issue where Within-Spec NotchLC file playback stuttered
- DSOF-20980 - Fixed the "rsync.exe failed to start" error on server shutdown
- DSOF-20952 - Fixed an issue where MSVCR100.dll was not found when d3service is started (nginx)
- DSOF-20911 - Fixed being unable to select MIDI device in MTC layer on server
- DSOF-20895 - Fixed an issue where 'manage workloads' caused new workloads to start continuously
- DSOF-20806 - Fixed node-js Conan package not being fully self-contained and needing an internet connection
- DSOF-20759 - Fixed an issue where a HAP mov file added as New Placeholder Clip did not function properly
- DSOF-20347 - Fixed an issue where clicking on frame replay OFF/ON created output in the widget
- DSOF-20258 - Fixed d3 crashing if the placeholder image and input are the same and the input is removed
