

## r22.1 Changelog

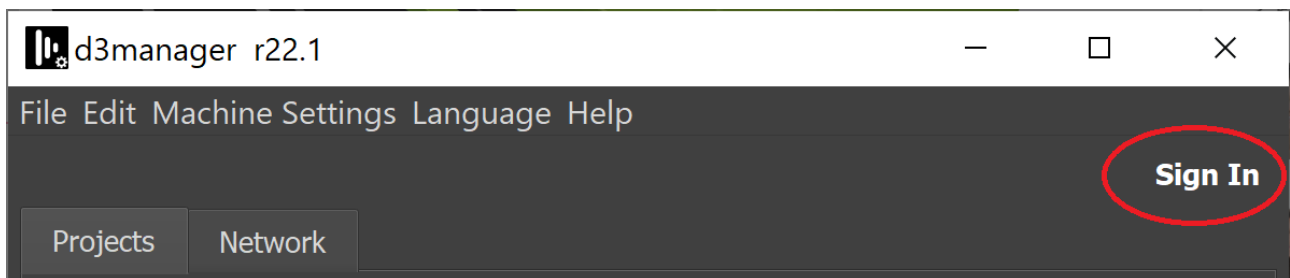

+-----+  
| r22.1 Release - 93749  
+-----+

Release day - 21st September 2022

## New Features

- disguise Cloud Integration

Designer r22.1 offers login to disguise Cloud through d3manager by clicking on the new “Sign In” button (circled red in the screenshot).

On sign in, you will be prompted to link your machine to your disguise Cloud account by following the on screen instructions. You can link your Designer install to an existing disguise Cloud account, or sign up for a new account.

If your Designer is not licensed, you will be able to acquire a Designer license via the Designer integration with disguise Cloud.

You can return to licence activation by clicking “Account” in the d3manager cloud menu. This will take you to your disguise Cloud account details page which includes Designer license activation functionality.

Further disguise Cloud integrated functionality in Designer will be rolled out over the coming months.
