[Download r31.0.4 Full \(Pro\)](#)

Full (Pro) build: 223832

Starter build: 223833

Released: July 30th 2025

Improvements

- **DSOF - 30789** - Plugin and web layer logs are now more comprehensive for easier debugging.
- **DSOF - 29891** - The [plugin API](#) has a new endpoint which will allow users to import .d3export files called `importFromPackageName`.

Fixes

- **DSOF - 30762** - Switching a DMX patch to output mode when some fields are toggled off will not longer produce a spurious error message.
- **DSOF - 30667** - Skeleton objects can now be correctly controlled with Rigid Body Tracking Sources.
