

Designer r30.8.6 Release Notes

[Download r30.8.6 Full \(Pro\)](#)

Full (Pro) build: 221470

Starter build: 221471

Released: July 7th 2025

Improvements

- **DSOF - 28616** - Changing warp markers on a Feed Map will no longer cause excessive console logging.

Fixes

- **DSOF - 30580** - Starter Designer will no longer fail to launch with a missing license error.
- **DSOF - 23546** - RenderStream workloads will no longer crash when reconfigured with 0 size and instead a helpful error message is displayed and the workload is not reconfigured until a valid size is set.
- **DSOF - 30581** - Using **Export Compositor Frame** in the feed view will now always produce an image at full resolution regardless of the level of zoom in the GUI.
- **DSOF - 30565** - The list of network adaptors displayed in the SMC UI will no update in realtime when adaptor settings change.
