Designer r31.2.2 Release Notes

[Download r31.2.2 Full (Pro)](#)

Full (Pro) build: *226526*
Starter build: *226527*
Released: *August 27th 2025*

Improvements

- **DSOF - 31053** - Python API users can create parameters for Open Layers without needing a Playhead over the Layer.

Fixes

- **DSOF - 31066** - v1 API 'list Resources' endpoint no longer returns an empty response, as it did before r31.2.
- **DSOF - 31064** - A machine not connected to the internet will no longer disable API functionality, as it did before r31.1.
- **DSOF - 31074**, **DSOF - 30960** - The 'Find/Replace Usage' button no longer reports an error and fails to open the usages menu, as it did before r31.1.
- **DSOF - 30864** - Arrowing into a UVLookUp layer no longer reports errors, as it did before r21.3.2.
- **DSOF - 30699** - The Designer installer now warns users about requiring CodeMeter Runtime, if it is not already installed, before continuing with installation.
- **DSOF - 31045** - When using the Python `Track.makeArrow` function to create an arrow between two layers not under the current Playhead, Designer will no longer report an error.
- **DSOF - 30930** - When removing time at the end of a track, Designer will no longer report a spurious error.
