

Powering the most ambitious live shows on the planet

Supporting live entertainment across the globe for over 20 years, our trusted solutions are proven to work in an environment where there's no margin for error.

Unlock spectacular live productions of any scale and complexity with Disguise's end-to-end solution. From headline festival performances, to world tours and Broadway shows, Disguise is the industry's most integrated and trusted platform, working with all parts of the AV ecosystem to bring your live show to life.

"The tour has been running for almost four years, and we've never had a failure during a show. We need to be confident that the tools we choose are going to be able to deliver the show - and we are."

Enter the next dimension of entertainment with Disguise

Pixel-perfect planning

Build a highly accurate representation of your stage where you can view and pre-plan every pixel.

Timeline control

Our timeline-based sequencer allows you to program your show according to the tracklist.

Supreme speed and precision

Make on-set changes to your show content in seconds.

AV Integrations

Respond to cues from other parts of the AV ecosystem, including audio, lighting and tracking.

Full flexibility

Receive and handle different versions of content and video formats.

Ultimate reliability

Count on auto-redundancy failover in the rare event of hardware failure.

Your live event toolkit

Software

Design, visualise, sequence and control your content for any show with Designer, the backbone of live event production for over 20 years.

Hardware

Our trusted media servers remove the risk from live events, ensuring you can deliver your vision with confidence.

Services

Partnering with you every step of the way, from initial design to full implementation, our technical and creative services provide seamless, tailored solutions for every project.

Support

Our unbeatable support packages, with global service centres and 24/7 care, ensure your production will always run without a hitch.
