

Designer r32.3.4 Release Notes

[Download r32.3.4 Full \(Pro\)](#)

Full (Pro) build: 241332

Starter build: 241333

Released: *March 5th 2026*

Fixes

- **DSOF - 31665** - Resolved an issue where Designer could occasionally CTD while using Precomps.
- **DSOF - 32045** - Setting the Render Node of an RenderStream Local layer to a machine that is not in the session now works as expected.
- **DSOF - 32015** - Actors that fail over but then are restored now receive tracking and DMX data correctly.
- **DSOF - 31123** - The Receive Health widget in the RenderStream Local layer now works correctly.
- **DSOF - 32219** - Tags and Notes will no longer sometimes move position after resizing the timeline.
- **DSOF - 32056** - Stopping and starting video capture rapidly will no longer sometimes report spurious errors.
- **DSOF - 32293** - RenderStream workloads with clusters of more than 1 machine will no longer sometimes get stuck on “Stopping” during workload shutdown.
