

Designer r33.0 Release Notes

[Download r33.0 Full \(Pro\)](#)

Full (Pro) build: 244214

Starter build: 244213

Released: *April 1st 2026*

Changes

In r33.0 we are moving a range of media servers from [End of Production](#) to [End of Support](#).

The servers that are being deprecated are listed here:

- [2x4pro](#)
- [GX 1](#)
- [GX 2](#)
- [GX 2C](#)
- [VX1](#)
- [VX 2](#)
- [VX 4](#)
- [VX 4N](#)

These servers will behave like normal computers on versions of r33.0 and above, meaning that you will need a software license (like [Designer Pro](#) or [X1](#)) to use the software with the normal restrictions of those licenses.

These servers will still function normally as d3 Media Servers on all supported releases up to and including r32 and will still receive software updates for critical bugfixes in the r32 branch in line with our [Product Life Cycle Policy](#). Release notes for r32 legacy support can be found [here](#).
