

# Designer r33.2.3 Release Notes

---

## [Download r33.2.3 Full \(Pro\)](#)

Full (Pro) build: 254006

Starter build: 254007

Released: *July 1st 2026*

Items marked with a ● are also included in [r32.4.11](#).

## Improvements

- **DSOF - 33130** - Both [Project Diagnostics and System Diagnostics](#) now include console log files from the last 30 days, rather than only the last seven, so diagnostics collected some time after an issue occurred still capture the relevant logs.

## Fixes

- **DSOF - 33027** - Resolved an issue where a [RenderStream](#) workload using a [Mesh Mapping](#) with **Enable Warp** disabled could report a CUDA error, preventing playback at reduced render resolution scales.
- **DSOF - 32563** - Resolved an issue where Designer could not identify Rivermax network adapters by their PCI path, preventing the correct ConnectX - 5 or ConnectX - 6 licence from being selected for IP video.
